What is Orion?

Encyclopedia of Life

What is Orion?

# Main Features

- Connected to EOL Database of documented animal species
- Facebook login functionality

Encyclopedia of Life

## How does it work?

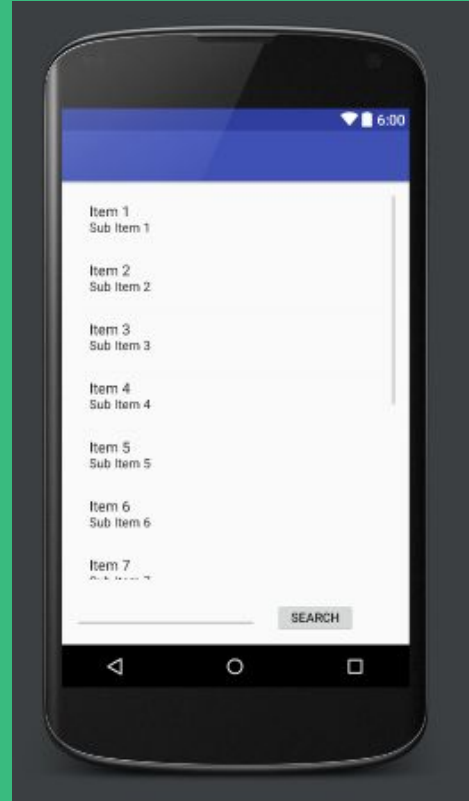

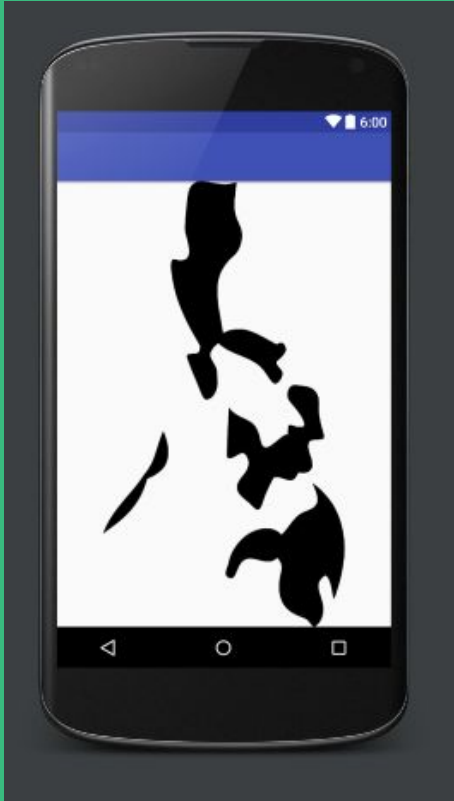

- Using Google Maps API, the app can access the user's location
- With the user's location, the app then queries into the EOL database and returns animal species which can be found around the area
- The query's output is stored in a list where the user can view the specifics of a chosen specie
